Patently Enabled January 2025, Part 2: Utility Models Are Another Kind of Patent Protection

The purpose of this monthly series Patently Enabled is to share simplified patent-related information to assist non-patent practitioners in making the best decisions when considering their intellectual property rights.

In the January edition of Patently Enabled, Day Pitney attorney George Chaclas continues the Foreign Patents series with Part 2, focusing on utility model patents. These patents, available in some countries but not in the United States, offer a streamlined, cost-effective path to securing foreign patent protection.

For any patent-related comments, questions or other inquiries, please contact registered patent attorney George Chaclas.
